1-800-349-6951

Upon completion of this course, the participant should understand:

- ⇒ The various types of planning and who is involved in the planning process.
- ⇒ The full and true cost of providing water service to your customers.
- ⇒ Inflation, indexing, and depreciation.
- ⇒ Operating, coverage, affordability and other important ratios.
- ⇒ Why asset management is crucial in the planning process.
- ⇒ What types of reserves are necessary for water system success.
- ⇒ VERY basic engineering.
- ⇒ Roles and responsibilities of engineers.
- ⇒ Relationship between the system and their engineer.
- ⇒ How your engineer can help in the planning process.
- ⇒ Valuable resources available from NDRWSA to assist with improving technical, managerial and financial capacity.
- ⇒ Sources of project funding and how to prepare for project development.
- ⇒ *"By failing to prepare, you are preparing to fail." Benjamin Franklin*

Training made possible by
funding from the
Department of
Environmental Quality
